## Summary

Highly motivated information technology graduate. I have interest in microservices, APIs, web development and innovative software development. Skilled in **Node JS, Javascript, React JS, HTML, CSS, JQuery, WordPress**, basics of **Data Structure and Algorithms**.

**Career Objective :** To get placed in a reputed company which provide a good working environment where I can use my skills to improve my career path and also achieve professional and technical satisfaction.

## Experince

**Web Developer**, September,2023 - Current

**Yudiz Solutions** - Lucknow, India

- Improved proficiency in front-end and back-end technologies. Knowledge of one or more web development frameworks or libraries. Understanding of responsive design principles.
- Built reusable code to utilise for other projects and to minimise costs.
- Contributed to front-end experience and collaborated on APIs
- Researched new programming languages, frameworks and technologies to stay abreast with latest trend.

## Projects

**Leave Management System:-**

- Implement a user authentication system to allow employees and administrators to log in with their credentials.
- Define different user roles such as employee, manager, and administrator. Each role will have specific permissions and access levels within the system.
- The Leave Management System project utilizes PHP for server-side logic, HTML and CSS for frontend structure and styling, and JavaScript for dynamic client-side interactions.

**Portfolio Web Site:-**

- Contains name, navigation links (Home, About, Projects, Contact), and also contain a logo.
- Brief introduction, showcasing your skills, education, and work experience, Use HTML and CSS for structure and styling.
- Tech Stack :- **HTML, CSS, JavaScript and React.js**.
